

Input specifications

Yachts - Exterior

1. **Basic 3D model of the yacht.**

Preferably in Rhino 3D format (.3dm), IGES (igs) or STEP (stp). Other 3D formats on request.

2. **Information about the (technical) installations of the yacht.**

Names or numbers of parts, supplier websites, PDFs and images from the Internet. Information about components that are to be added to the model (eg: deck fittings, anchor / anchor plate, mast equipment, tender/crane, wheel house, furniture etc.)

3. **Materials, colors.**

Paint supplier, name or number (Hull color - AWLGRIP Majestic-Blue, etc.)

Other materials to be supplied as samples or sample images (fabric / leather, wood)

4. **Teak layout drawing.**

PDF or DWG drawing. Depending on the detail needed, the teak is visualized with a texture or fully modelled.

5. **Camera angles.**

This can be drawn on top of a floorplan, screen dumps from your own drawing software or pictures from existing interiors showing the preferred camera angles.

6. **Background photography / running images.**

High resolution images from existing yachts. We will remove the old yacht and replace it with the new 3d rendered yacht.

If no background photography can be delivered we can suggest images from our database.
